

Company Search Using Library Resources

Step 1: Look up NAICS codes

Go to
<https://www.census.gov/eos/www/naics>

Find "NAICS Search" box on left and enter one-word keyword searches.

Select a result for more detailed codes within the topic.

Be strategic in your keyword searches. NAICS codes are specific, but it may take some thought to find what you're looking for based on a one-word keyword search option.

Step 2: Look up companies using NAICS codes:

Use Nexis Uni, found under databases on McDermott Library's home page:
<https://www.utdallas.edu/library>

On the Nexis Uni homepage, select "Business" on top left Menu drop-down.

Select "Create a Company List".

Enter NAICS code and select "Search Primary NAICS Codes".

Under "Geographic Information" and "Regions/Countries" edit to show results from specific countries, cities, postal or area codes.

Select "Create" to get your list of companies.

Notice "Current News" and other options on company pages.
